SUMMARY

I am currently a master student (2021-2024) at the [School of Chemical Engineering and Technology, Xi'an Jiaotong University](#) advised by Prof. [Simin Wang](#). My work is now related to gas combustion of the hydrogen blended fuel combustion, these involves:

- *Focusing* on the experimental and computational research of hydrogen blended fuel combustion.
- *Utilizing* numerical methods, including CFD simulations, to study Hydrogen Blending Combustion.
- *Investigating* the impact of hydrogen blending on emissions and performance.
- *Studying* interactions between hydrogen and other fuel components, particularly natural gas.
- *Developing* novel strategies to optimize hydrogen blending for improved combustion efficiency.

EDUCATION

Xinjiang University

- *Bachelor of Process Equipment and Control Engineering.* Urumqi, Xinjiang | Sep 2017 - Aug 2021
- Cumulative **GPA:** 3.59/5.00 (approx. 3.44/4.00) (Average: 85.92)
- Relevant Coursework: *Process Fluid Machinery* and *Process Equipment Design*.

Xi'an Jiaotong University

- *Master of Power Engineering and Engineering Thermophysics.* Xi'an, Shaanxi | Sep 2021- Current
- Cumulative **GPA:** 3.47/4.00 (Average:87.20)
- Relevant Coursework: *Numerical Heat Transfer* and *Advanced Engineering Thermodynamics*.

EXPERIENCE

- **2017**
 - Worked in the Secretariat of the School of Chemical Engineering, Xinjiang University from Sep 2017 to Jan 2018.
- **2018**
 - Completed a metalworking internship at the Engineering Training Center, Xinjiang University from Nov to Dec 2018.
 - Currently serving as dormitory head and safety officer of Room 402, Building 11, Xinjiang University since Sep 9, 2018.
- **2021**
 - Participated in the 11th National Conference on Fluidization and Particle Technology in 2021, held in Hangzhou, Zhejiang, China.
 - Participated in the study of transfer rules of the fluid catalytic cracking (FCC) oil additives blending zone [**project**].
- **2022**
 - Attended Chemical Engineering Machinery Conference in 2022, held in Xi'an, Shaanxi, China.
 - Completed the analysis of the vibration situation of the pressure pipeline at a certain hydrogenation station.
 - Participated in the construction of the experimental platform for dual-dispersed fluidization and observation of agglomeration characteristics, as well as the renovation of the experimental platform [**project**].
 - Participated in the design and construction of the experimental platform for the submerged combustion crystallizer (SCC) and crystallization device, as well as conducting experiments [**project**].
 - Participated in the construction of the experimental platform for testing hydrogen-enriched combustion in civil use, as well as conducting numerical simulation work [**project**].
- **2023**

- I am currently focused on numerical and experimental work related to hydrogen-blended natural gas (HENG) combustion to facilitate a future where we can achieve carbon neutrality and live sustainable lifestyle.

PUBLICATIONS

- **Conference Paper**
 - *Study on Flame Characteristics and Pollutant Distribution of Methane-Hydrogen Combustion* in the Chemical Engineering Machinery Conference.
- **Journal Paper**
 - Submitted a scientific paper on *a micro planar combustor that utilizes non-premixed H₂/air combustion*.

AWARDS & HONORS

- **2018-2019**
 - Received Certificate of Honor for Xinjiang Uygur Autonomous Region People's Government Scholarship for Motivation at Xinjiang University, Urumqi, Xinjiang, China.
 - Received the title of 'Advanced Individual' in the 'Practice of Educating People through Folk Traditional Toys' thematic activity at Xinjiang University, Urumqi, Xinjiang, China.
 - Received the first prize and certificate of Class C in the national English competition for university students in the autonomous region in Urumqi, Xinjiang, China.
- **2019-2020**
 - Received Certificate of Honor for Xinjiang Uygur Autonomous Region People's Government Scholarship for Motivation at Xinjiang University, Urumqi, Xinjiang, China.
- **2021-2022**
 - Awarded the qualification for direct admission to graduate school without entrance examination during undergraduate studies.
 - Awarded the Paper Certificate for the conference paper "Study on Flame Characteristics and Pollutant Distribution of Methane-Hydrogen Combustion," which was submitted to the Chemical Engineering Machinery Conference in 2022, held in Xi'an, Shaanxi, China.

OTHER SKILLS & INTERESTS

- I have always had a passion for reading books and writing down my reflections on life experiences.
- Likewise, I enjoy exercising my body through activities such as swimming, jogging, and more.
- Lastly, I have a strong passion for engaging with and contributing towards solving real-world problems that still remain unresolved.
